

TITLE 410 INDIANA STATE DEPARTMENT OF HEALTH

LSA Document #13-350

SUMMARY OF CHANGES BETWEEN PROPOSED RULE AND FINAL RULE

1. **Section 57(b)(2):** Added the word “or” at the end of subdivision (1). Replaced the wording of subdivision (2) with “Is a system component independent of the soil absorption field that meets the effluent quality requirements of NSF/ANSI for certification under Standard 40 as a Class I plant, and that is approved by the department under the provisions of section 52(h) of this rule.”

This change provides clarification as to what secondary treatment components may be used. It does not change the intent or the requirements of this section, as the requirements are already in section 60(h). This change in wording makes it easier for the local health departments to cite this section of the rule without always having to go back and also cite section 60(h).

2. **Section 57, Table I:** deleted footnote 4.

A new footnote 4 was added and all subsequent footnotes were renumbered. Footnote 5 was added to reflect that change but footnote 4 was not deleted. This change corrects the inadvertent typographical error.

3. **Section 64(e)(5):** deleted the words “and during cleaning or exchange”

Changes proposed to allow for the use of additional filter technologies without compromising the primary purpose of the filters.

4. **Section 76(f):** added the words “or a sanitary tee,”

This is a change that must be made for consistency in the rule.
